

# Daily Health Screening for COVID-19 for Anyone Entering the Building

The person conducting screenings should maintain 6 feet distance while asking questions. Ask these questions to anyone entering the facility or transportation vehicle (including children, staff, family members, or other visitors). If no person is accompanying the child during drop-off, use your best judgment if the child can respond on their own.

**People should not be at the child care facility if they may have been exposed to COVID-19 or are showing symptoms of fever, chills, shortness of breath, difficulty breathing, new cough, or new loss of taste or smell.**

**1. Have you or any of the children you are dropping off had close contact (within 6 feet for at least 15 minutes) in the last 14 days with someone diagnosed with COVID-19, or has any health department or health care provider been in contact with you and advised you to quarantine?**

- Yes > The individual should not be at the child care facility. The individual can return 14 days after the last time he or she had close contact with someone with COVID-19, or as listed below.
- No > The individual can be at the child care facility if he or she is not experiencing symptoms.

**2. Do you or do any of the children you are dropping off have any of these symptoms?**

- Fever
- Chills
- Shortness of breath or difficulty breathing
- New cough
- New loss of taste or smell

If an individual has any of these symptoms, they should go home, stay away from other people, and the family member should call the child's health care provider.

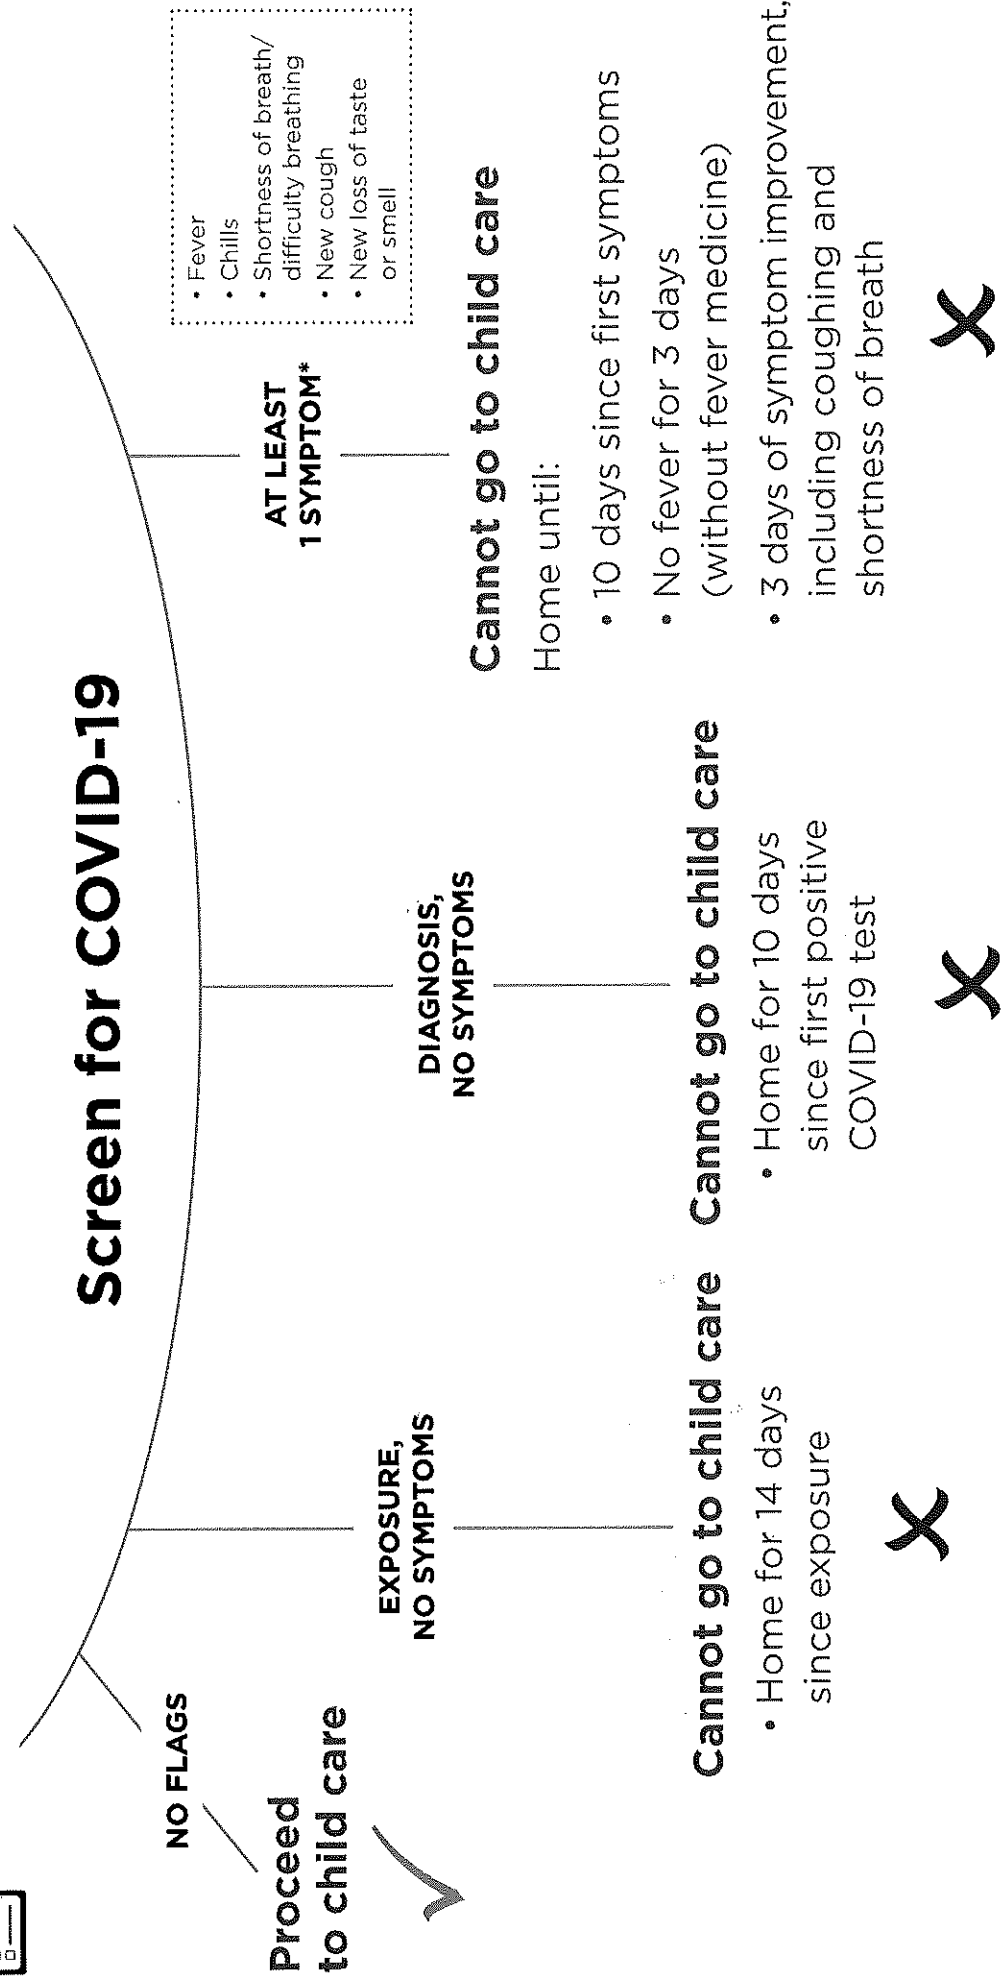

**3. Since they were last at the child care facility, have you or have any of the children you are dropping off been diagnosed with COVID-19?**

- Yes | If a person is diagnosed with COVID-19 based on a test or their symptoms, they should not be at child care and should stay home until they meet the criteria below.
- No

# Handling Suspected, Presumptive or Confirmed Cases of COVID-19 Flow Chart and Protocol

## Screening Flow Chart

\*The more narrow set of COVID-19 symptoms listed here reflects required exclusionary symptoms in order to avoid over-exclusion of people from child care facilities.
